

# Test Plan Summary

## 1. Objective of testing

The purpose of this test plan is to ensure functionality, usability and proper working of the features in the BookCart website. The goal is to identify any defects or bugs that may impact the website.

## 2. Scope of testing (Features being tested)

- User Registration and Login
- Product Search
- Wishlist Functionality
- Cart Management
- Checkout Process

## 3. Out of Scope of testing (Features not being tested)

- API Testing
- Security Testing

## 4. Resources used for testing

- **System**- Linux Ubuntu Laptop
- **Browser**- Google Chrome browser
- **Tools**- Selenium WebDriver, Java, Eclipse, Excel

## 5. Risks and Assumptions

Risks can be that external APIs or features are not working properly which is affecting the functionality of the website.

It is assumed that the website is working as developed and no mistakes or errors have occurred with the website while testing. Any bugs found are not the expected behaviour we wanted while development.
